

ECCC Document Summary for IAAC Registry:

Project Name: Baptiste Nickel Project

Document Type: FAAR Response

Document Summary

Environment and Climate Change Canada (ECCC) prepared this document at the request of the Impact Assessment Agency of Canada for the Baptiste Nickel Project and provides information related to departmental regulatory responsibilities and key issues. ECCC expert groups have reviewed the information provided with a focus on identifying information gaps and areas requiring clarification or follow-up to understand effects within federal jurisdiction and within ECCC's mandate.

ECCC Review/Response Related to: Species at risk and migratory birds, water quality and quantity, air quality, permitting/regulatory, accidents and malfunctions, climate change resilience, and greenhouse gas emissions.

Additional Information

This document provides a high-level summary of ECCC's response to the Federal Authority Advice Record (FAAR) and the main issues identified through expert review. The FAAR is available in English, the official language in which it was originally written. Should you wish to receive the document in French, Canada's other official language, please contact the Impact Assessment Agency of Canada (IAAC). The original document was developed by ECCC; this summary was prepared and translated using AI-supported tools, with the original summary developed in English.
